

“ICEHEAD” High-Power Headphone Amplifier

To use this headphone amplifier follow these directions.

1. Plug Headphones into jack closest to the LED.
2. Plug Source (i.e. MP3 player, USB DAC, Sound Card, CD player) into jack closest to the Volume Control.
3. NOTE: Unit draws 10 milliAmperes. Do not leave on unnecessarily or you will have to change batteries more often than necessary.
4. It is recommended to use a rechargeable *nickel-metal hydride* battery, (NiMH).

NOTE: THERE ARE NO USER SERVICABLE PARTS INSIDE THIS HEADPHONE AMPLIFIER.

ALSO NOTE: This unit requires a ‘burn-in’ period to achieve its full sonic potential. Usually after a few hours you will notice a big difference in the sound quality.

OPENING UNIT WILL DESTROY IT!!!

DO NOT REMOVE BOTTOM COVER!
